---

Debi,

Thank you for your patience and I am sorry for the delay on this project, we have been backed up. Based upon these points and heights, this project would not need a TSP from the LCPA. If any of these points or heights change, please resubmit a new application for evaluation.

Kind Regards,

Barry Anderson

Good afternoon,

In response to your email below please find a completed Tall Structures Application and a copy of the Master Site Plan. If you have any questions or require any additional information, please let me know.

Thank you,

Debi

Debi,

In order to properly evaluate the property and see if tall structures permit will be required I will need a completed tall structures application for each building that is to be evaluated which can be found here: <https://www.flylcpa.com/uploads/pagesfiles/3091.pdf>

Please also include any temporary equipment, such as cranes, that may be used for the project as well. I have provided an example in the attached link below. Please let me know if you have any additional questions and I will be happy to help.

Example: <https://www.flylcpa.com/uploads/pagesfiles/3092.pdf>

Kind Regards,

Barry Anderson

Good afternoon,

I am working on a project named Inspiration at South Pointe currently under review with Development Review (DOS2021-00058). We received an RAI letter from staff, one of the comments stated that we may need to obtain a Tall Structures Permit from LCPA. I tried to determine if we do, however I am not exactly sure. A copy of the site plan and an aerial exhibit are attached. The project consists of three parcels (16-45-24-43-00001.0000, 15-45-24-00-00019.0000 and 15-45-24-00-00018.0000).

If you could assist in determining if we need to apply for a permit, thank you.
